To the Class of 1958:

When you read this message it will be warm. Now, as I am dictating the note we are in the midst of the coldest spell of the winter. Many people are ill and others are wondering if the cold weather will ever cease. That is the way of life. At times the sun is always shining and there is not a cloud in the sky; then things change rapidly, but do not become discouraged. Having troubles or difficulties in itself is not all bad. What we *do* about them is the important thing.

The class of 1958, as I write this, has done very well. You have achieved exceptionally well in the field of scholarship, in athletic and forensic competition, and have shown a fine sense of discrimination in selecting your leaders. The attributes and abilities which have resulted in the accomplishments enumerated above can be enhanced by determining to do your best on any job you undertake. When this is done your future and the future of your community will be assured.
